SOLOMON RUNZONZA

Hamden, CT 06518 | solomonrunzonza@outlook.com | 2036689742 | LinkedIn | GitHub

PROFILE

Tech-savvy and results-oriented professional with demonstrated expertise in securing complex IT infrastructures, conducting thorough vulnerability assessments, and ensuring compliance with organizational policies and industry standards. Adept at designing, deploying, and maintaining scalable networks that optimize performance and protect critical assets. Collaborative team player, well-versed in thriving in cross-functional environments, leveraging strong interpersonal skills to build cohesive, high-performing teams. Skilled in system administration, network monitoring, and security analysis. Proficient in examining network traffic, detecting irregular patterns, and maintaining secure IT environments. Committed to enhancing threat visibility, supporting secure operations, and strengthening enterprise or government network security frameworks.

CERTIFICATIONS

AWS, AWS Certified Solutions Architect – Associate — April 2029
CompTIA Security+ ce Certification — January 2029
Cisco – CCNA — February 2028

TECHNICAL SKILLS

Programming Languages: Python, SQL, DuckyScript, PHP, Powershell & Bash
Ethical Hacking & Penetration Testing: Nmap, Metasploit, Kali, BloodHound, Gobuster, Nikto, Nessus
Cybersecurity Frameworks: NIST CSF, ISO/IEC 27001, PCI DSS, HIPAA, GDPR, CISA, MITRE ATT&CK
Network Security: Suricata, pfSense, Splunk, Security Groups(AWS)
Network Protocols: HTTPS, DNS, TCP, TSL, SSH, OSPF, Ethernet, SMTP, Wi-Fi, Vlan
CTF Platforms: TryHackMe, Hack The Box, VulnHub, Blue Team Labs

ACADEMIC PROJECTS & LABS

Insider Threat Detection Program - Capstone — January 2026 – May 2026

- Designed and implemented an insider threat detection framework using AWS cloud services to monitor anomalous user behavior and access patterns.
- Applied practical threat modeling, risk assessment, and mitigation strategies to strengthen enterprise security posture

PenTest – GreyMatter IT — August 2025 – December 2025

- Conducted internal and external penetration testing against enterprise systems and network services at GreyMatter IT to identify security vulnerabilities and assess organizational attack exposure.
- Performed vulnerability scanning, reconnaissance, and exploitation validation using industry-standard security tools to support risk remediation efforts and improve overall security posture at GreyMatter IT.

RELEVANT EXPERIENCE

Nzvikisa Group of Schools — Chiredzi, Zimbabwe
Computer Science Teacher — February 2023 – August 2024

- Achieved 100% student pass rate by delivering comprehensive instruction in programming, algorithms, and data structures to 70 students while reinforcing core computing and cybersecurity concepts.
- Enabled reliable digital learning infrastructure across the school by designing and successfully implementing a fully operational Local Area Network (LAN).

Wozatel — Bulawayo, Zimbabwe
Systems Administrator - Intern — January 2021 – December 2021

- Streamlined organizational security posture by executing system patching, conducting vulnerability checks, and implementing timely remediation actions.
- Decreased 30% recurring technical incidents by monitoring system and network logs, identifying anomalies, and escalating potential security threats for rapid mitigation.

N Richards & Co — City, State
Systems Administrator - Intern — November 2016 – August 2018

- Promoted secure and stable workstation operations for 100+ employees by maintaining user systems across organization.
- Enhanced organization-wide cybersecurity awareness for 300+ employees by delivering practical computer security training and secure computing best practices.

EDUCATION

Quinnipiac University, School of Computing and Engineering Hamden, CT
Ms in Cybersecurity | **GPA: 3.89** May 2026

Midlands State University Gweru, Zimbabwe
Information Systems | **GPA: 3.87** December 2022
